

Size Guide

Our kits are race cut and made to feel good. The jerseys are race cut and the bibs are compression. Please check all 4 measurements against our unisex guide.

Our measurements cross over sizes because lycra stretches. Carefully check which sizing all or most of your measurements fall into, selecting the largest size if you fall into 2 categories.

You'll need to measure the widest point of your chest and waist.

Our warmers are made to correlate with your kit sizing, so you can select the same size warmers as your jersey or bibs! For example, if you are medium in NeoPro kit, you will be medium in arm, leg or knee warmers. You still need to check your measurements below even if you are only ordering warmers.
